## Eco Global Starts Delivery of Eighteen New Customer Homes

SPRING VALLEY, CA, Apr. 28, 2010 (Marketwire) --

SPRING VALLEY, CA -- (Marketwire) -- 04/28/10 -- Eco Global Corporation (PINKSHEETS: ECOG) announced today that it will start shipping INCABLOCK kits as early as next week to Dixie Homes de Mexico S.A. de C. V. This will be an additional order from the original 700-house letter of intent received earlier this month. Daniel Correa stated, "These new orders will concentrate on those potential home buyers that have vacant lots and want to build on such lots."

Eco Global has been selected because of its ability to delivery a quality designed kit house at a very competitive price that can be constructed faster, be more cost effective, and can be shipped almost anywhere. These first houses are being placed through a government program in Mexico known as "Infonavit" which finances the sale of the house to employees with a housing program through their employers. The Company believes this market may be the most overlooked market in Mexico. Eco Global has the ability to ship a designed kit house made from interlocking cement block that is stronger, fire resistant, termite free, and eco friendly.

### About Eco Global Corporation

To exemplify the practicality of INCABLOCK-based housing, Eco Global has built several model homes in varying configurations for the Mexican market and government programs. This effort has positioned the company to finalize an agreement calling for the building of a large number of affordable INCABLOCK homes in Mexico. To facilitate large low cost developments, Eco Global has created a turnkey program that includes all the elements needed for a successful operation anywhere in the world: the licensing for manufacturing INCABLOCKS on site, all the necessary equipment, and complete set up procedures, specification software, factory training, and on-call field support.
