Eco Global Corporation to Offer up to 300 New Designed Models for Inca Block Kits ; ;

SPRING VALLEY, CA, May 6, 2010 (Marketwire) --

SPRING VALLEY, CA -- (Marketwire) -- 05/06/10 -- Eco Global Corporation (PINKSHEETS: ECOG) has recently made an agreement with the architectural design firm Arquimex, to convert and allow the use of its exclusive house designs for the Eco Global housing kits. Arquimex's selection which includes hundreds of design plans will give the Eco Global customers an opportunity to choose a variety of designs with various options of Eco's Kits Houses. The available sizes will range from 800 SF to 4000 SF.

Eco Global plans to market Arquimex's catalog of houses throughout its existing clients of Dixie Homes de Mexico, who is operating in North and South Baja California, Sonora and Jalisco, as well as to several other builders located in California, USA, and through real estate and land sales offices just to name a few.

Eco Global kit houses are a pre package selection of the patented interlocking "IncaBlocks" pre assembled at the factory, in the correct assortment of blocks, and then ship directly to the construction site for final assembly. Due to the interlocking and self aligning properties of Incablock, assembly can be done by semi skilled labor, faster, and usually to a higher quality standard than regular block.

Eco Global just started offering kits assemblies to Dixie Homes of Mexico. It is now getting requests for approximately an order per day for just the city of Tijuana. Mr. Correa, president, plans to tour Mexicali in the near future to view the damages caused from the recent earthquake, where the conventional block had failed to withstand the damage of the earthquake. We believe that the Incablock Construction System is far better product in resisting earthquakes due to their interlocking capabilities, making the building more flexible to movement compared to a monolithic format of the conventional block construction.

About Eco Global Corporation

To exemplify the practicality of INCABLOCK-based housing, Eco Global has built several model homes in varying configurations for the Mexican market and government programs. This effort has positioned the company to finalize an agreement calling for the building of a large number of affordable INCABLOCK homes in Mexico. To facilitate large low cost developments, Eco Global has created a turnkey program that includes all the elements needed for a successful operation anywhere in the world: the licensing for manufacturing INCABLOCKS on site, all the necessary equipment, and complete set up procedures, specification software, factory training, and on-call field support. Under the right circumstances, Eco Global will also consider joint venture partnerships with developers.

More information can be found on the Eco Global web sites "www.ecoglobalcorp.com"; or "www.incablock.com"; contact number is 619-550-2396. Product samples are available and may be shipped world-wide to qualified recipients.
